After due deliberation the following resolution was adopted by unanimous vote of board on motion by B.D. Black seconded by John D. Rogers and carried:

"Whereas there is a scarcity of water at Blanding for irrigation and culinary use and it is urgent that some new source be developed and the most feasible plan is the construction of a tunnel through the main ridge of The Blue Mountain about eighteen miles north of Blanding in order to get water from the southeast fork of Indian Creek and certain of its tributaries diverted into Johnson Creek to augment the supply there. Also there is great need of promoting a project to furnish

work the needy unemployed of the section in conformity with letter and spirit of laws enacted for National Recovery.
